

Advancing the reconstruction of Ukraine together

SMS group contributions – November 2026

SMS group

SMS group shapes the metals industry for more than 150 years

13,000
employees

10,600
plants installed around the world since 1871

5,000+
granted patents

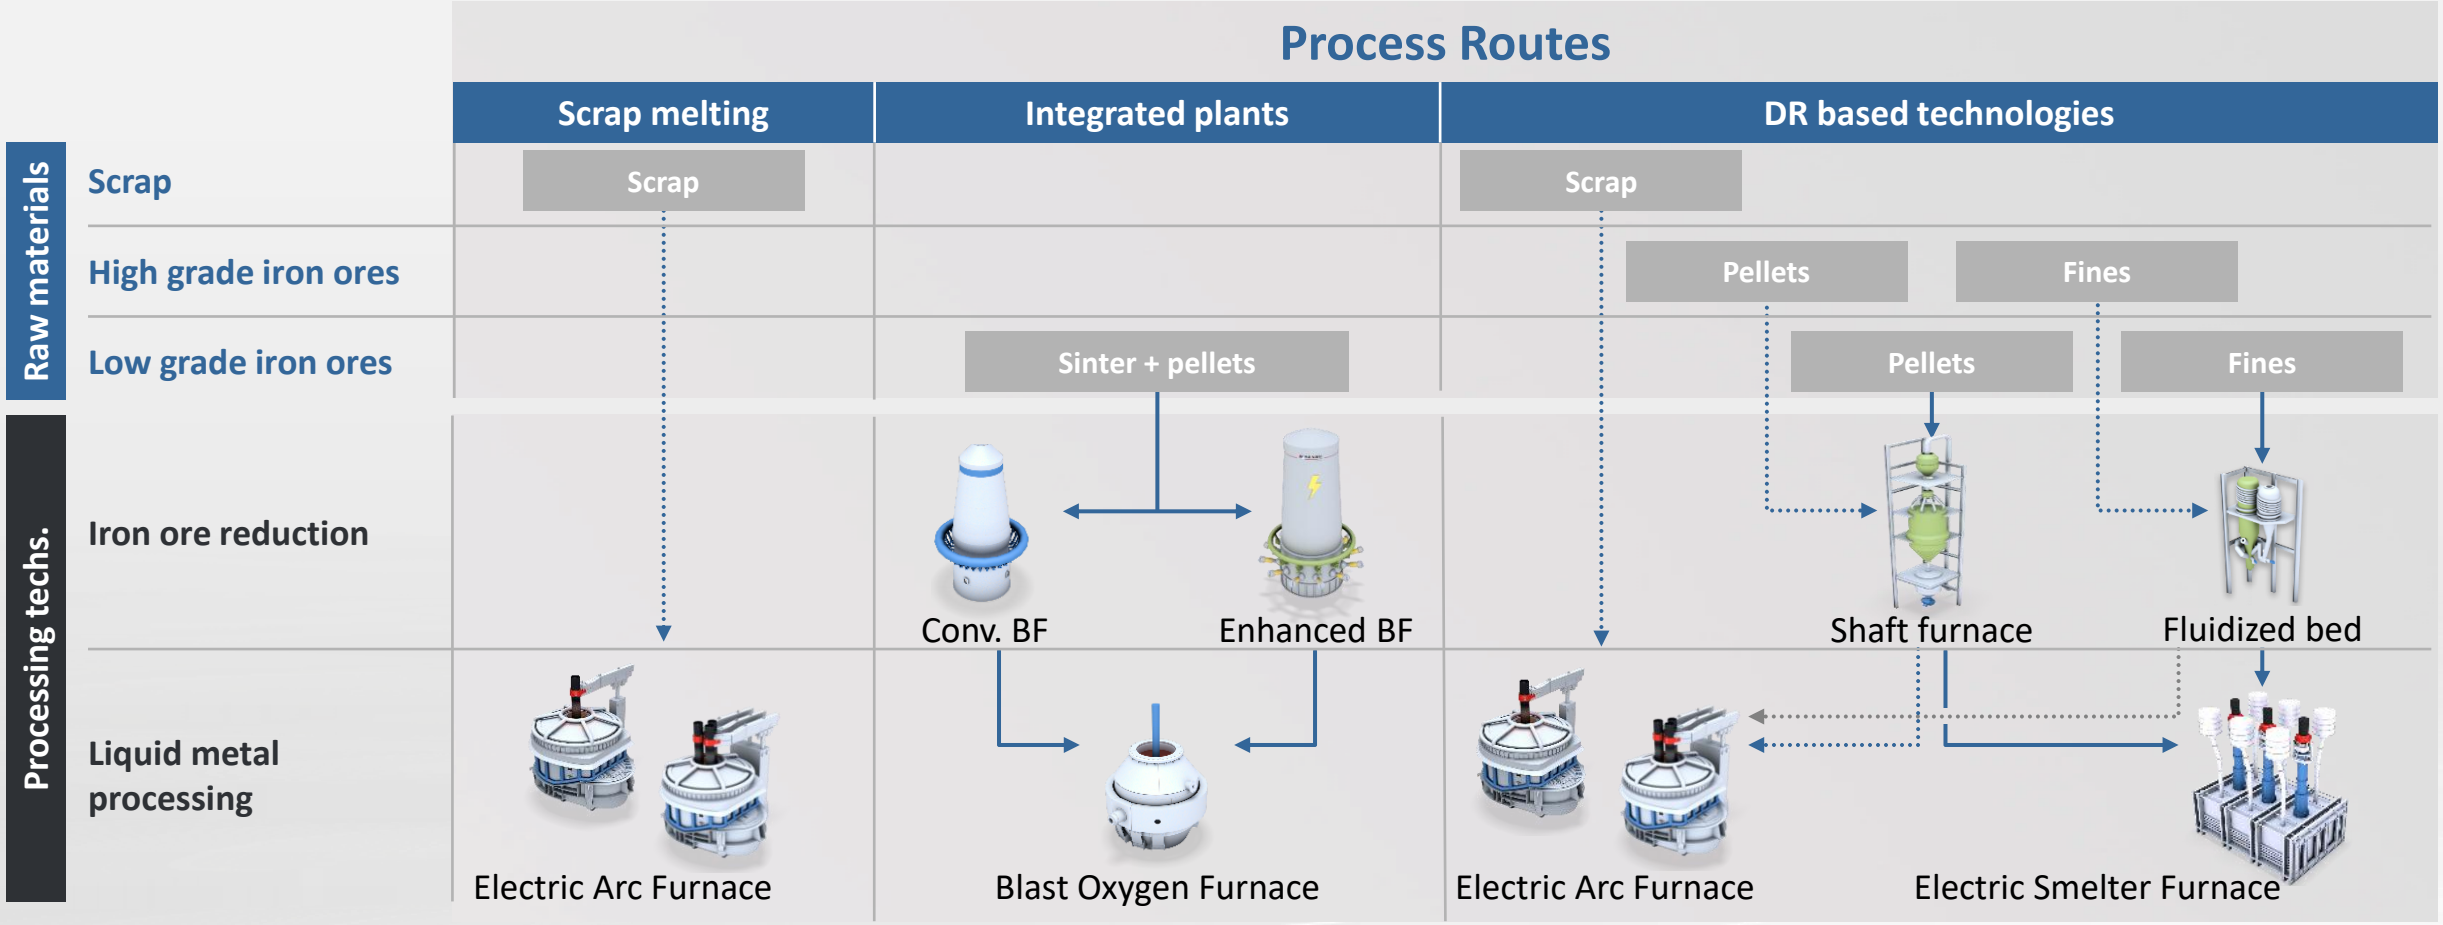
96
customer projects ongoing

7 major workshops worldwide covering more than **490,000 m²**

33
service centers

3 major process routes are available to decarbonize

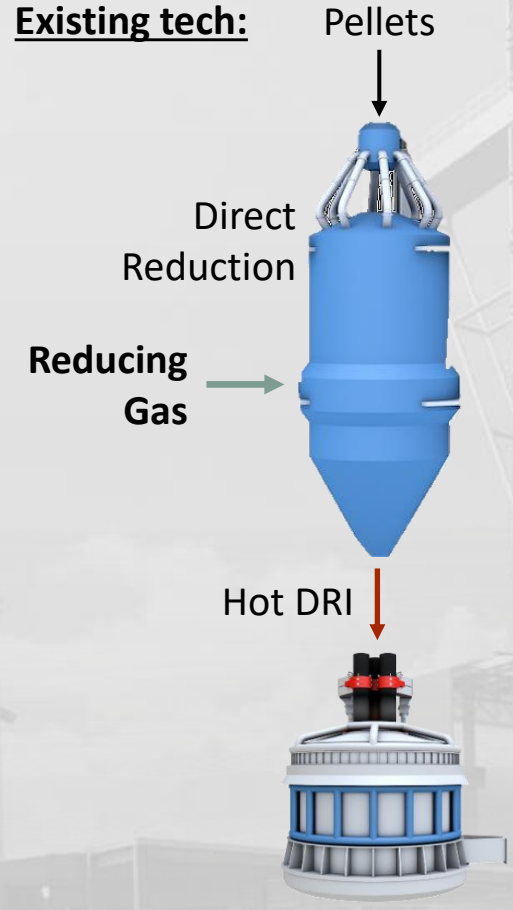
Flexible solutions to sustain and accelerate decarbonization worldwide



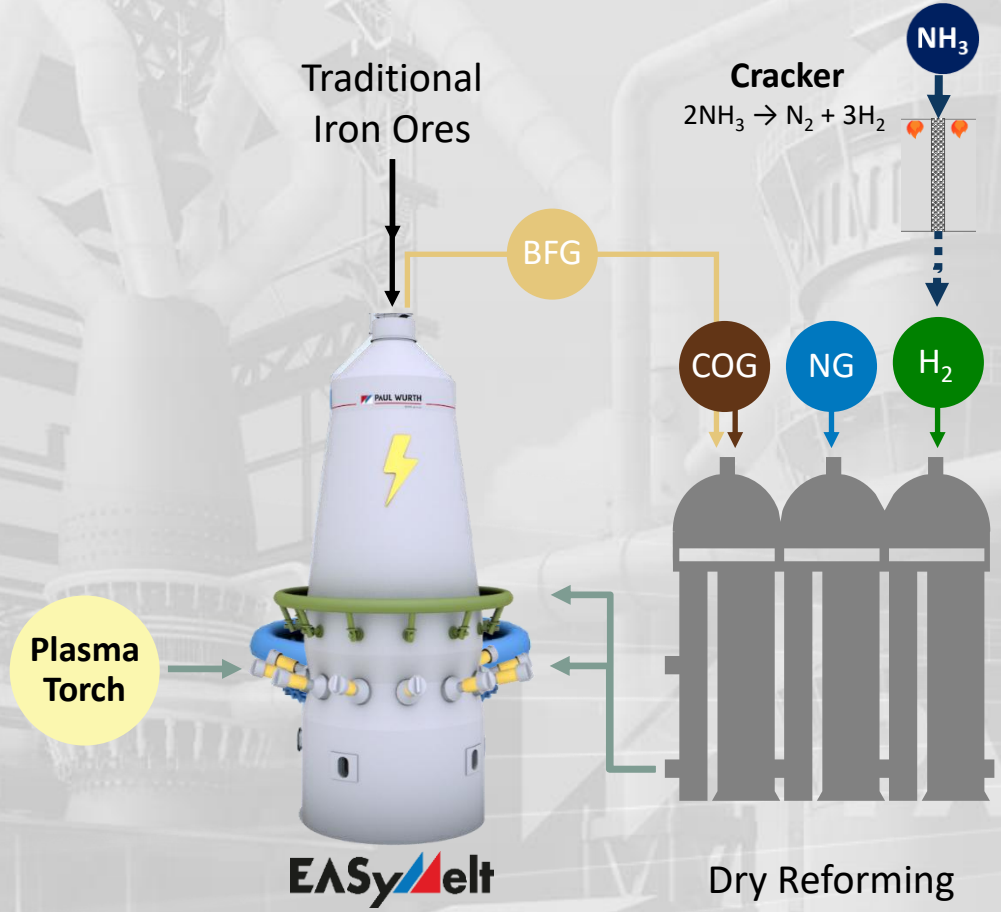
Paul Wurth EASyMelt: the most flexible solution for BF decarbonization

Dry Reforming, Plasma Heating, and Hydrogen Use for effective CO_2 Reduction

Existing tech:



Innovation:



Key features:

1. Refresh and Reuse **BF top gas**
2. Electrification via **plasma torch**
3. Use of **hydrogen** when available, e.g., via NH_3 cracking
4. Progressive CO2 emissions reduction up to 70%

SMS group

Being a robust partner to prepare the future

We have been supporting Ukraine since the beginning of the invasion

Continuous support to employees and partners affected by the war. Business-wise, ongoing dialogue with Ukrainian steel producers to keep critical operations running

SMS group will be ready to join a future cooperation to rebuild Ukraine

Open to partnering with Ukrainian authorities, industry and financing institutions on rebuilding steel and metals capacity

Ready to provide innovative solutions for the green transition of the Ukrainian steel industry

Technology and expertise for decarbonizing steel production and creating lasting value for the Ukrainian steel industry
