4

Local Project Steering Committees

5

Pilot Project “Energy Efficiency Improvement of Orhei Hospital”

Beneficiaries and local partners:

- Approx. 16 thousand patients/year
- Approx. 700 Orhei Hospital Employees
- Orhei Mayoralty
- Orhei District Council

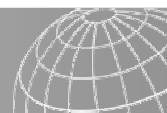

Budget = 1.7 Mio. MDL

6

Main intervention areas

- Conducting a comprehensive energy assessment of the hospital
- Identify the most relevant needs for increasing energy efficiency
- Prepare all necessary technical documents for the public procurement process
- Support the Regional Development Agency in the quality control of the acquisition and implementation
- Assist the hospital management in increasing the capacities of its staff in relation to energy management
- Facilitate the installation of an energy monitoring system
- Document all processes in order to support the replication of the best practices

Pilot Project “Energy Efficient Street Illumination for Tătărauca Veche Community”

Beneficiaries and local partners:

- Approx. 2.000 inhabitants of seven communities
- Tătărauca Veche Mayoralty
- New local service provider
- Soroca Rayon Council

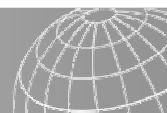

Budget = 800,000 MDL

Main intervention areas

- Setting up a local steering committee
- Conduct a study on the most adequate technical solution for street illumination in small rural communities
- Support the identification of the appropriate legal form of the service provider
- Assist in the formal and operational installation of the service provider
- Provide technical assistance in the preparation of all technical documents for the public procurement process
- Accompany the Regional Development Agency in launching the acquisition and supervising the installation
- Document all processes in order to support the replication of the best practices

9

- Support to the Regional Development Agency in the public acquisition and quality control of the construction services for water supply
- Economic and organization analysis of service provider, initiation of capacity development activities of its staff
- Baseline study on environmental and socio-economic factors in relation to water and sanitation
- Integrated and participatory planning for water and sanitation on Rayon level
- Preparation of a guideline to facilitate replication of the planning approach in other Rayons
- Preparation of pre-feasibility investment studies for future infrastructure projects

12

Pilot Project “Water supply services in the Village of Rosu, Cahul Rayon”

Beneficiaries:

- 3.700 villagers of Rosu
- Service provider “Apa Canal Cahul”
- Rosu mayoralty
- Rayon Council Cahul

Budget = 3.2 Mio. MDL

13

Main intervention areas

- Setting up of a local steering committee
- Preparation of all necessary technical drawings for water supply, and sanitation services
- Support to the Regional Development Agency in the public acquisition and quality control of the construction services for water supply
- Economic and organization analysis of service provider, initiation of capacity development activities of its staff
- Baseline study on environmental and socio-economic factors in relation to water and sanitation
- Integrated and participatory planning for water and sanitation on Rayon level
- Preparation of a guideline to facilitate replication of the planning approach in other Rayons
- Preparation of pre-feasibility investment studies for future infrastructure projects

14

Pilot Project “Expanding the Integrated Solid Waste Management from the Town of Soldanesti towards Seven Villages from Soldanesti and Rezina Rayons”

Beneficiaries:

- Approx. 15.000 inhabitants of Şoldăneşti micro-region
- ME “Regia Apă Şoldăneşti ”
- 8 mayoralties
- Rayon Council Şoldăneşti
- Rayon Council Rezina

Budget = 4 Mio. MDL

Main intervention areas

- Setting up a local steering committee
- Preparation of all necessary technical drawings for sanitary land fill
- Support to the local public authorities and the regional institutions in requesting co-funding
- Economic and organization analysis of service provider
- Baseline study on environmental and socio-economic factors in relation to solid waste management

Regional Planning and Programming

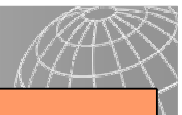

Areas of intervention (2012-14):

- Update Regional Development Strategies by inclusion of new priority area Energy Efficiency of Public Assets
- Updating of Regional Operational Plans in Water and Sanitation, Solid Waste Management and Energy Efficiency of Public Buildings
- Capacity Development of Regional Development Agencies and Councils

Partners and Mediators:

- financial support through Swedish Sida
- three Regional Development Agencies
- three Regional Development Councils
- MRDC, MoEconomy, Agency for Energy Efficiency, MoEnvironment

17

Main intervention areas
